SSA... without auxiliary switch

SSA...1 with auxiliary switch

## **Electrical actuators**

for radiator valves, MiniCombiValves (MCV) and small valves

SSA31... SSA81... SSA61...

- SSA31... operating voltage AC 230 V
- SSA81... operating voltage AC 24 V
- 3-position control signal 3-position control signal DC 0...10 V control signal
- SSA61... operating voltage AC / DC 24 V ٠
- Nominal force 100 N
- Automatic identification of valve stroke
- Direct mounting with coupling nut, no tools required •
- · Basic types complete with plug-in connecting cable, length 1.5 m
- Optional cable types
  - Cable length 1.5 m, 2.5 m and 4.5 m •
    - Halogen-free cables
    - 2.5 m cables with Batigyr connector
- Manual override and position indication •
- Parallel connection of multiple actuators possible
- Auxiliary switch integrated in SSA31.1 and SSA81.1 actuators
- Optional tamper-proof fitting to prevent dismantling

Use

- For radiator valves, VDN..., VEN..., VUN... and MiniCombiValves, VPD..., VPE...
- For small valves, VD1...CLC
- For radiator valves with M30 x 1.5 screwed fitting, nominal closing dimension 11.6 mm and a 2.5 mm nominal stroke (without adapter). Also for use with third-party valves in conjunction with AV-type adapter
- For modulating or 3-position control in heating systems, chilled ceilings and terminal units.

Type reference	Operating voltage	Run time at 50 Hz	Control signal	Connecting cable	Auxiliary switch
SSA31				1.5 m	
SSA31/00 <sup>1)</sup>	AC 230 V AC 24 V	- 150 s	3-position	no cable	
SSA31.1				1.5 m	Yes
SSA81				1.5 m	
SSA81/00 <sup>1)</sup>				no cable	
SSA81.1				1.5 m	Yes
SSA61	AC / DC 24 V	34 s	DC 010 V	1.5 m	
SSA61/00 <sup>1)</sup>	AC / DC 24 V			no cable	

For available cable lengths or terminal block connectors refer to "Accessories", page 3

#### Accessories

Type reference	Description	Operating voltage	Control signal		
ASY3L15	Connecting cable 1.5 m				
ASY3L25	Connecting cable 2.5 m	AC 230 V			
ASY3L45	Connecting cable 4.5 m				
ASY8L15	Connecting cable 1.5 m	2 maaitia			
ASY8L25	Connecting cable 2.5 m	3-positio			
ASY8L25B	Connecting cable 2.5 m with Batigyr connector	AC 24 V			
ASY8L45	Connecting cable 4.5 m				
ASY8L45HF	Connecting cable 4.5 m, halogen-free, VDE 0207-24				
ASY6L15	Connecting cable 1.5 m				
ASY6L25	Connecting cable 2.5 m	AC / DC 24 V DC 010 V			
ASY6L45	Connecting cable 4.5 m	AC / DC 24 V	DC 010 V		
ASY6L45HF	Connecting cable 4.5 m, halogen-free, VDE 0207-24				
ASY98	Retaining screw for terminal block connectors				
ASY99	Terminal block connector for 3-position actuators SSA81/00				
ASY100	Terminal block connector for DC 010 V modulating actuators SSA61/00				
AL40	Tamper-proof fitting to prevent dismantling of actuators

Notes		
Engineering	The actuators mus to "Connection diag	t be electrically connected in accordance with local regulations (refer
$\triangle$ Caution	Regulations and i	requirements to ensure the safety of people and property must
	The connecting cal provided the tempe Actuator types SS/	mperatures (refer to "Technical data", page 6) must be observed. ble of the actuator may come into contact with the hot valve body, erature of the valve body does not exceed 80 °C. A 31.1 and SSA81.1 have a built-in auxiliary switch. The switch other actuators later.
Mounting	•	ons (Ref. 74 319 0497 0) are enclosed in the product packaging. alve are assembled with the coupling nut; no tools or adjustments
		be fitted in position 1 with the power disconnected (refer also to
$\Delta$ Caution		uator and tighten the coupling nut manually
	<ul> <li>Avoid lateral pre In the case of actual</li> </ul>	tools such as wrenches essure or (cable) tension on the mounted actuator! ators without a connecting cable (SSA/00), the separately ordered nector and connecting cable must be fitted.
Orientation	90°	•
Commissioning	switch, if fitted.	ing, check the wiring and the functioning of the actuator and auxiliary $(from position 1 to 0)$ ; Value closes

Self-calibration	During commissioning and whenever the operating voltage is switched on, the SSA61 runs a self-calibration routine. (Valve stroke $0 \rightarrow Max$ . stroke $\rightarrow$ Setpoint). Never intervene manually in this process.
Note: Correct calibration is only possible • with valve • stroke > 1.5 mm	The second or third attempt at calibration occurs automatically after an 8-minute delay. After three failed calibration attempts the actuator stem remains in the extended position and the radiator valves are closed. For valves with strokes < 1.5 mm, the actuator/valve combination locks after three failed calibration attempts.
	The new Siemens type VDN…, VEN… and VUN… radiator valves have in all 1.5 mm stroke.
Operation	A 3 mm hexagonal socket wrench can be used to move the actuator to any position between 0 and 1. However, if a control signal from the controller is present, then this takes priority in determining the position.
Note	To retain the manually set position, unplug the connecting cable or switch off the operating voltage and the control signal.
Manual override Maintenance	$ \begin{array}{c} \hline \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ $
$\triangle$	<ul> <li>Turn power off (e.g. remove the plug)</li> <li>If necessary, disconnect electrical connections from the terminals</li> <li>The actuator must be commissioned only with a correctly mounted valve in place!</li> </ul>
Repair	SSA actuators cannot be repaired; the complete unit must be replaced.
Disposal	The device must not be disposed of together with domestic waste. This applies in particular to the PCB. Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view. <b>Current local legislation must be observed.</b>
	The technical data given for these applications is valid only when the actuators are used with the Siemens valves listed under "Equipment combinations", page 2. The use of the SSA actuators in conjunction with third-party valves invalidates any warranty offered by Siemens Building Technologies / HVAC Products.
